Warehouse

From Manufacturer to End User - Photo Documentation Simplified

LoadProof Extend revolutionizes how supply chain teams track and verify loads across multiple handoffs. Whether your pallet is leaving the warehouse, passing through a cross-dock, or arriving at its final destination, LoadProof Extend ensures photo documentation is consistently collected, securely stored, and easily accessed.

With QR code-enabled tracking and intelligent metadata handling, your operations become more transparent, more traceable, and more efficient no matter how complex your supply chain is.

Who Is This For?

Supply chain professionals handling

Anytime Access

Multi-stop transfers

High-value goods

Third-party logistics (3PLs)

Key Benefits

- QR Code Convenience**
Easily generate a unique QR code for each load, no app download required. Just scan, snap photos, and submit proof from any device, right at the dock or staging area.
- Integrated Proof for Multiple Shipments**
Handle mixed or partial shipments with ease. Document multiple proofs of shipment under a single, clean digital record, providing one reliable source of data so nothing gets missed and everything stays organized.

- Controlled Access for Non-Users**
Not everyone on the dock needs full system access. Allow drivers, third-party contractors, and temporary staff to upload photos directly to a load without needing a username or password.
- Verified Submissions with Driver Credential Access**
Only authorized team members or approved drivers can submit proof, ensuring the right people are accountable for the right shipment proof documentation.

Talk to Our Solution Expert

Let's build a smarter, more traceable supply chain together. Our team is here to help you configure the ideal LoadProof Extend solution tailored to your operational needs.
