## Photo Document Shipments and Pallets from Multiple Angles without Disrupting Workflow

The LoadProof Photo Capture Tunnel is designed to automate and simplify the pallet photo documentation process without disrupting your workflow. By integrating semi-automation and smart capture technology, LPPCT ensures every outbound load is documented quickly, consistently, and with zero guesswork.

Capture complete visuals of every pallet on the move, seamlessly, hands-free, and without missing a single detail. It's a simple, scalable solution for businesses that need reliability and speed.

## Key Benefits

- ✓

**Photo Capture All Key Angles in a One Pass**

LPPCT automates the photo documentation process by capturing every pallet from key angles in a single motion. There's no need for manual intervention, ensuring that each outbound load is consistently and thoroughly documented without disrupting operational flow
- ✓

**Train Less, Operate Efficiently**

Designed with simplicity in mind, LoadProof Photo Capture Tunnel requires minimal training. Even new or temporary staff can begin using the system almost immediately, reducing onboarding time and allowing operations to run smoothly even during staffing transitions or peak seasons.

- ✓

**Eliminate Human Error and Inconsistencies**

Manual photo capture processes often lead to human error, resulting in incomplete or missed documentation. LPPCT removes this risk by standardizing 360 degree photo capture across all shifts, ensuring complete visual records for every load, every time
- ✓

**Automation That Keeps Operations Moving**

Once installed and configured, LoadProof Photo Capture Tunnel functions with minimal supervision. The system seamlessly integrates into existing workflows, capturing and uploading images from all required angles without slowing down productivity or requiring manual oversight
- ✓

**Compliance and Accountability Built In**

Photos are automatically time-stamped, categorized, and securely uploaded to the cloud. This provides a tamper-proof, searchable archive of visual records, ideal for audit trails, customer transparency, damage or shortage claims, and regulatory compliance.
