About Azure Integration

Azure Integration connects LoadProof with your existing Microsoft ecosystem, enabling single sign-on (SSO) and centralized identity management. This eliminates multiple logins, reduces security risks, and helps your teams focus on what matters: running logistics and supply chain operations efficiently.

With this integration, every login is faster, every setup is simpler, and security is never compromised all while allowing full access to your LoadProof photo and video documentation..

Key Benefits

✔ Seamless Single Sign-On (SSO)

Log in to LoadProof using your existing Azure or Microsoft account (Outlook, Skype, etc.). You don't need separate credentials. This reduces login steps, saves time, and keeps workflows moving without interruptions.

✔ Enhanced Security

Leverage Azure's enterprise-grade security features, including multi-factor authentication (MFA). By relying on Azure credentials, you reduce the risk of unauthorized access and strengthen your overall security posture.

✔ Simplified User Setup

Adding new users is a quick and straightforward process. Simply enter their Azure-associated email address in LoadProof, and they're ready to go, no extra onboarding or complex IT involvement required.

✔ Faster Operational Access

Eliminate extra login steps and allow your team to move seamlessly between LoadProof and other Microsoft services. Quick, hassle-free access, no extra logins, just what they need when they need it

✔ Consistent User Experience

Provide your teams with a unified, familiar login process across Microsoft services and LoadProof. This consistency improves user adoption and reduces training time
