Turn Your Packing Station Into a Visual Proof Hub

- ✓ **Sturdy and stable:** No shaking or slipping while recording.
- ✓ **Easy to adjust:** Works whether you're packing boxes or wrapping pallets.
- ✓ **Warehouse-proof:** Built to stand up to dust, bumps, and long shifts.

Key Benefits

✓ Smart QR/Barcode Scanning

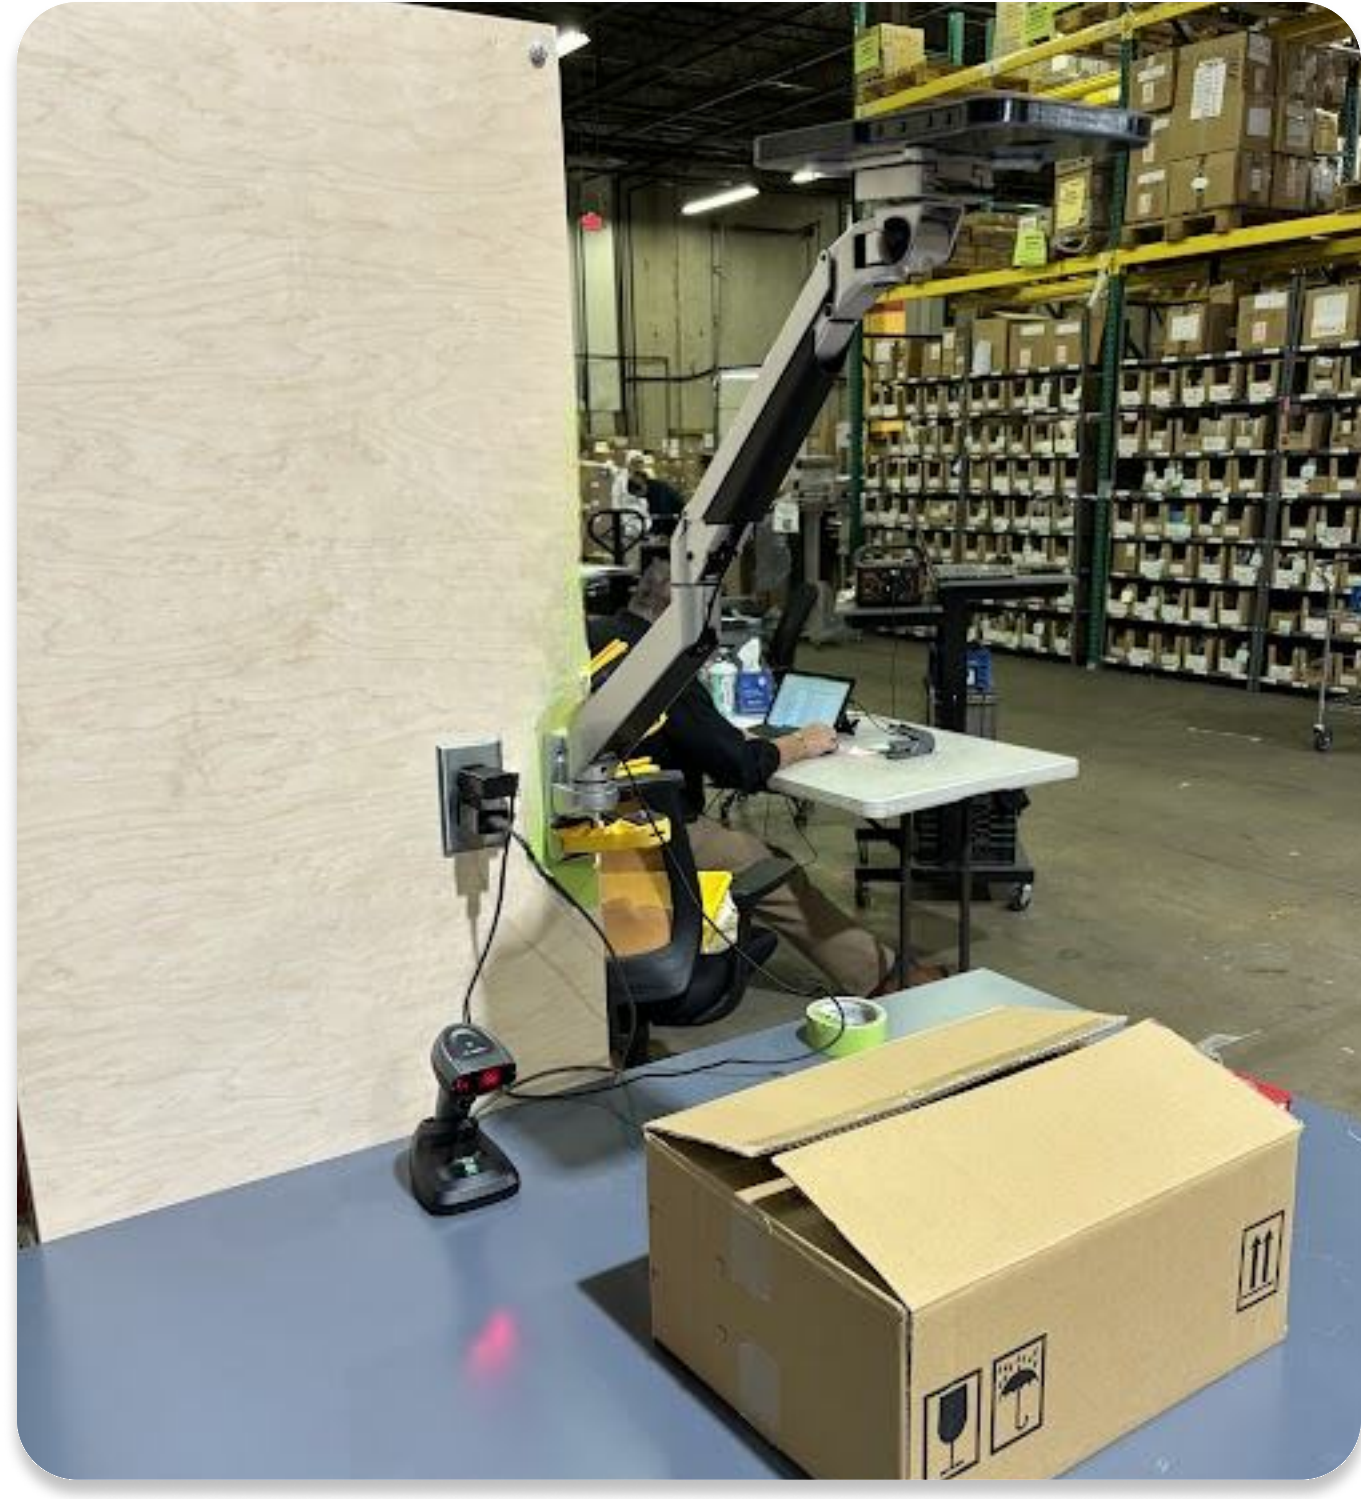

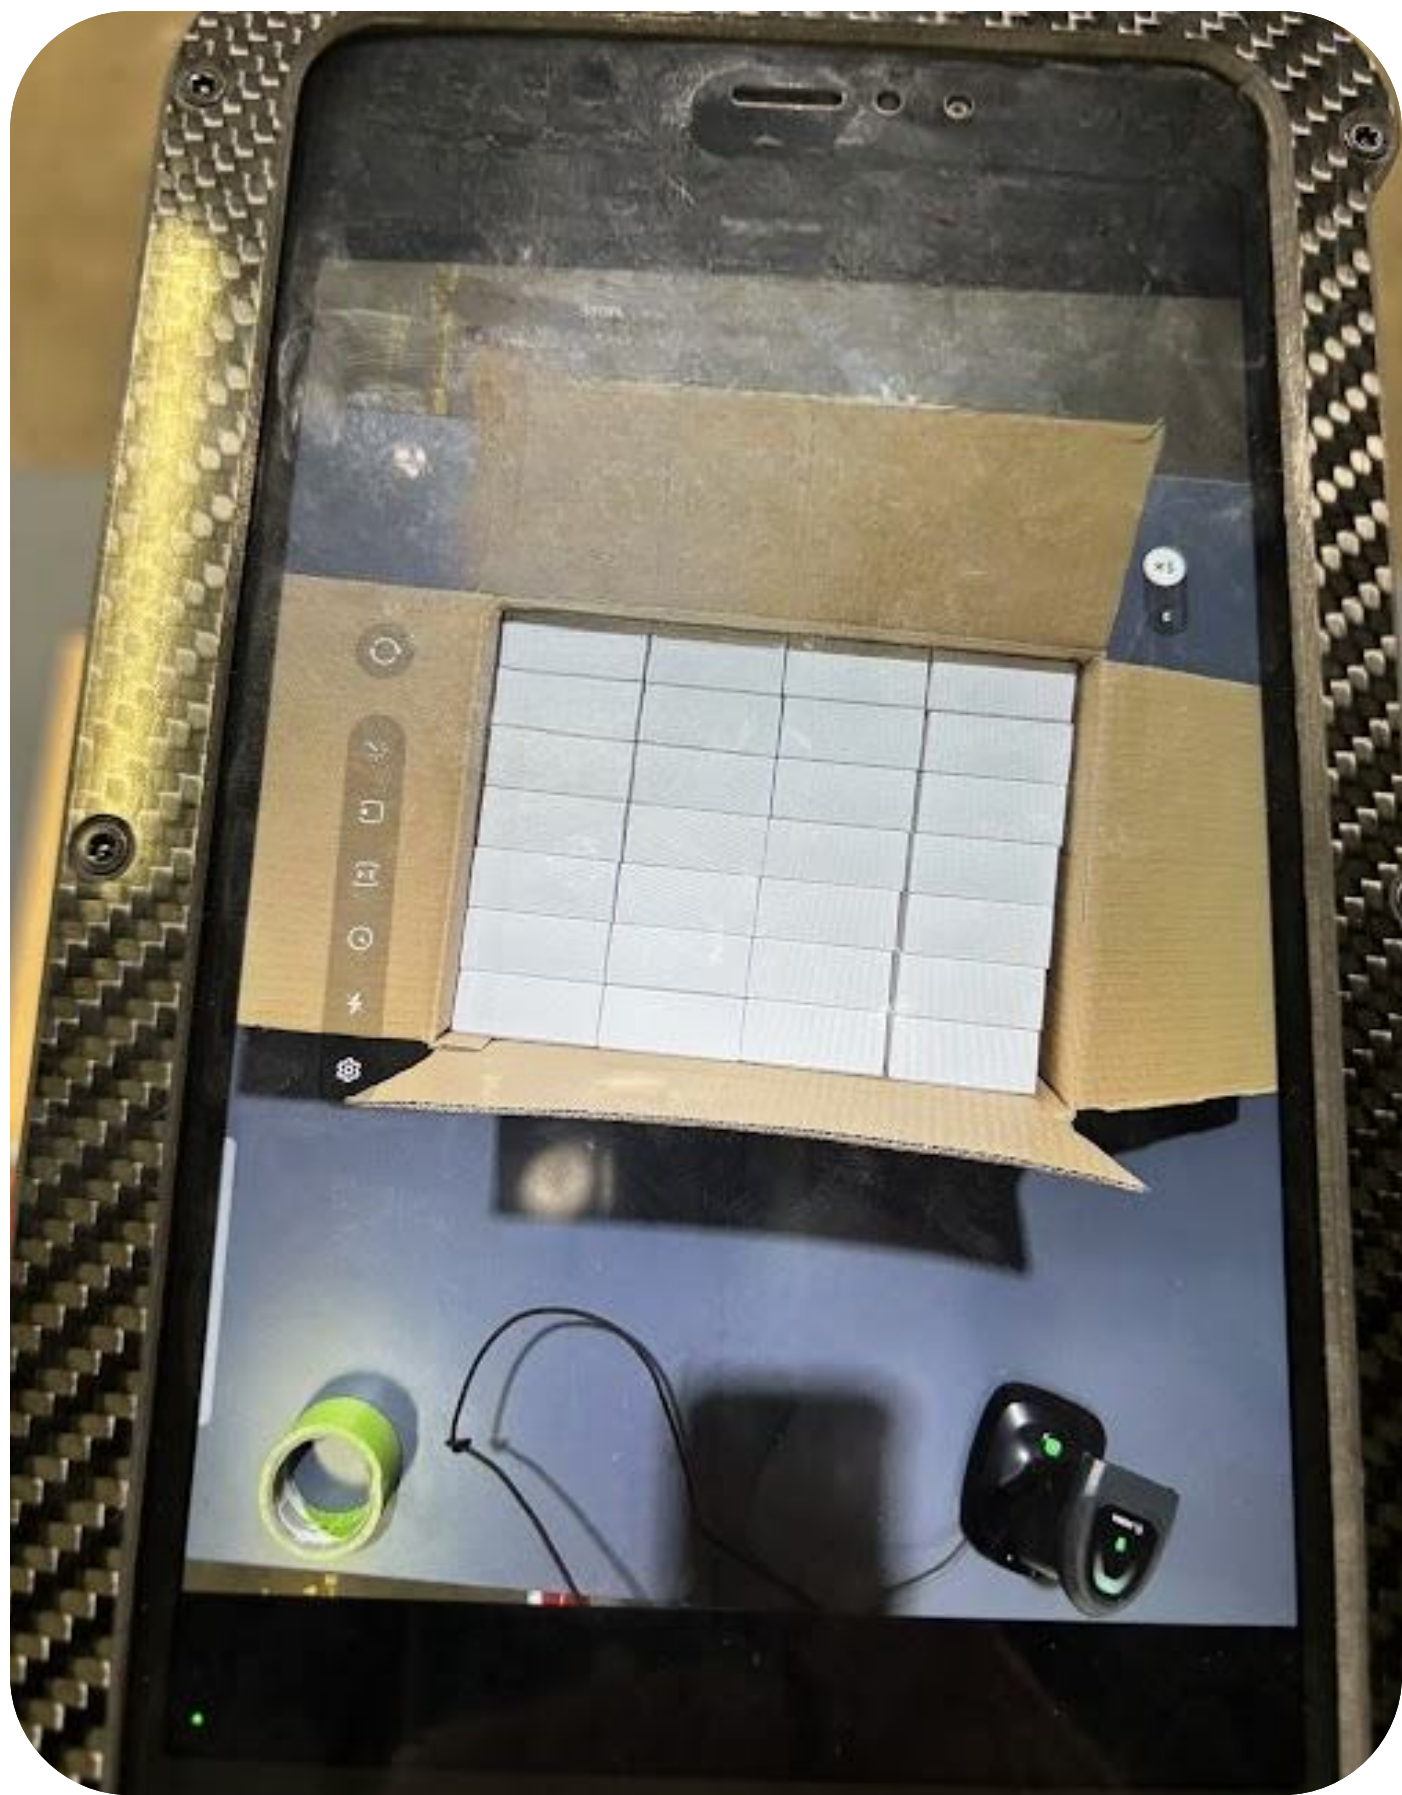

Scan any order-specific barcode or QR code to instantly pull up shipment details. LoadProof automatically tags all captured photos or videos to the correct order—no manual entry needed, eliminating confusion and saving time.

✓ Hands-Free Auto Video Capture

Once scanned, the mobile device (mounted above the packing station) starts recording video automatically. This hands-free operation allows workers to stay focused on packing while capturing every detail—pallet condition, wrapping, labeling, and more.

✓ Automatic Cloud Upload with Metadata

After packing, photos and videos are uploaded directly to LoadProof's secure cloud, fully tagged with shipment data. Each photo / video includes time, date, user, and location metadata, making it easy to trace and retrieve proof when needed—without extra steps.

How It Helps You Win

- ✓ **Improve documentation consistency**
- ✓ **Reduce errors in manual uploads**
- ✓ **Capture video/photo evidence in a semi-automated way**
- ✓ **Maintain full accountability without slowing down the team**
