What is LoadProof Stretch Wrap Mount ?

In high-volume warehouse environments, time is precious and accuracy is critical. The LoadProof Stretch Wrap Mount combines automation with precision, ensuring every pallet that leaves your dock is fully documented without slowing down your operations.

This innovative mount allows you to securely attach a tablet or mobile directly to your stretch wrap machine, transforming a routine packaging step into a powerful documentation checkpoint. As pallets are being wrapped, photos are automatically captured, giving you a reliable visual record of how each shipment was prepared.
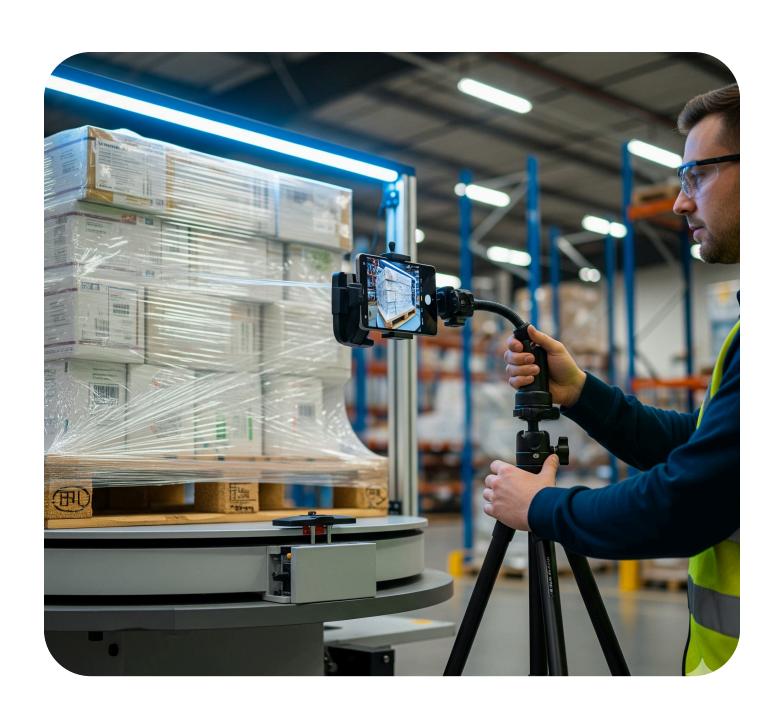

Key Benefits

✓ **Mounts Directly on the Stretch Wrap Machine**

Your tablet or mobile can be securely attached to your existing stretch wrap machine using a specially designed mount. This means you don't need extra space or new equipment. As your team wraps pallets like they normally do, the mounted tablet is positioned perfectly to capture images of the load. This simple setup transforms a routine packaging step into a powerful quality check, without interrupting your current workflow.

✓ **Automatic Photo Capture While Wrapping**

Once the mount is installed and the LoadProof app is running, it automatically takes photos while the pallet is being wrapped. No one needs to stop what they're doing to manually take pictures. It's a smooth, hands-free process that works in the background. This saves time and ensures that no steps are skipped when documenting your outbound loads.

✓ **Time-Stamped Visual Proof**

Each photo taken by LoadProof includes an automatic time and date stamp. This gives you solid proof of when and how each pallet was wrapped. It's especially useful when you need to show evidence for customer disputes, damage claims, or to meet strict retailer compliance requirements. Having this visual record readily available can help you avoid costly chargebacks and protect your reputation.

✓ **Clear and Consistent Documentation**

Because the tablet is fixed in one position on the stretch wrap machine, every photo is taken from the same angle and distance. This ensures high-quality, clear, and consistent images for every load. You don't have to worry about blurry or incomplete photos caused by human error. The photo documentation is reliable, professional, and ready whenever you need it.

How it works

1. Setup LoadProof Mounting Arm

Mount the tablet to your stretch wrap machine using the custom LoadProof mounting arm.

2. Enable Loadproof App

Enable the LoadProof app, configured for your workflows and categories.

3. Photos Captured

As each pallet is wrapped, photos are captured automatically, with no manual input required.

4. Cloud Upload

All images are securely uploaded to the cloud, organized, and ready to access anytime.
