Optimize Every Step of Your Workflow

LoadProof gives teams the insight and control they need to manage every shipment with confidence. Whether you’re handling a handful of loads or thousands, you can easily track progress, monitor timings, and see exactly where delays or inefficiencies occur. With clear, accurate, and easily accessible data, your team can analyze performance, identify bottlenecks, and make informed decisions that improve productivity.

What You Can Do with Custom Category Load Time Tracker

Track Custom Loads with Ease

View the exact upload and movement time for loads in your custom categories. Always know when a load was created, processed, or completed, giving you a clear view of progress at every stage.

Set Tracking Paths

Create tracking paths that reflect your operation, from Truck Gate In to Truck Gate Out, or any other key stages unique to your workflow. You decide what to track, and LoadProof handles the rest.

Get Real-Time Visibility

Monitor loads as they progress through each step in real-time. Stay informed about bottlenecks, spot delays early, and ensure that your team reacts quickly to keep things running smoothly.

Simplify Monitoring Effortlessly

Tracking begins automatically the moment a load is uploaded; no need for manual updates or data entry. Less time spent checking, more time spent improving operations.

Use Data to Plan Better

Accurate time tracking means smarter decisions. Use clear visibility into every stage to plan labor, allocate resources, and minimize idle time across shifts or departments.

Gain Insights That Drive Action

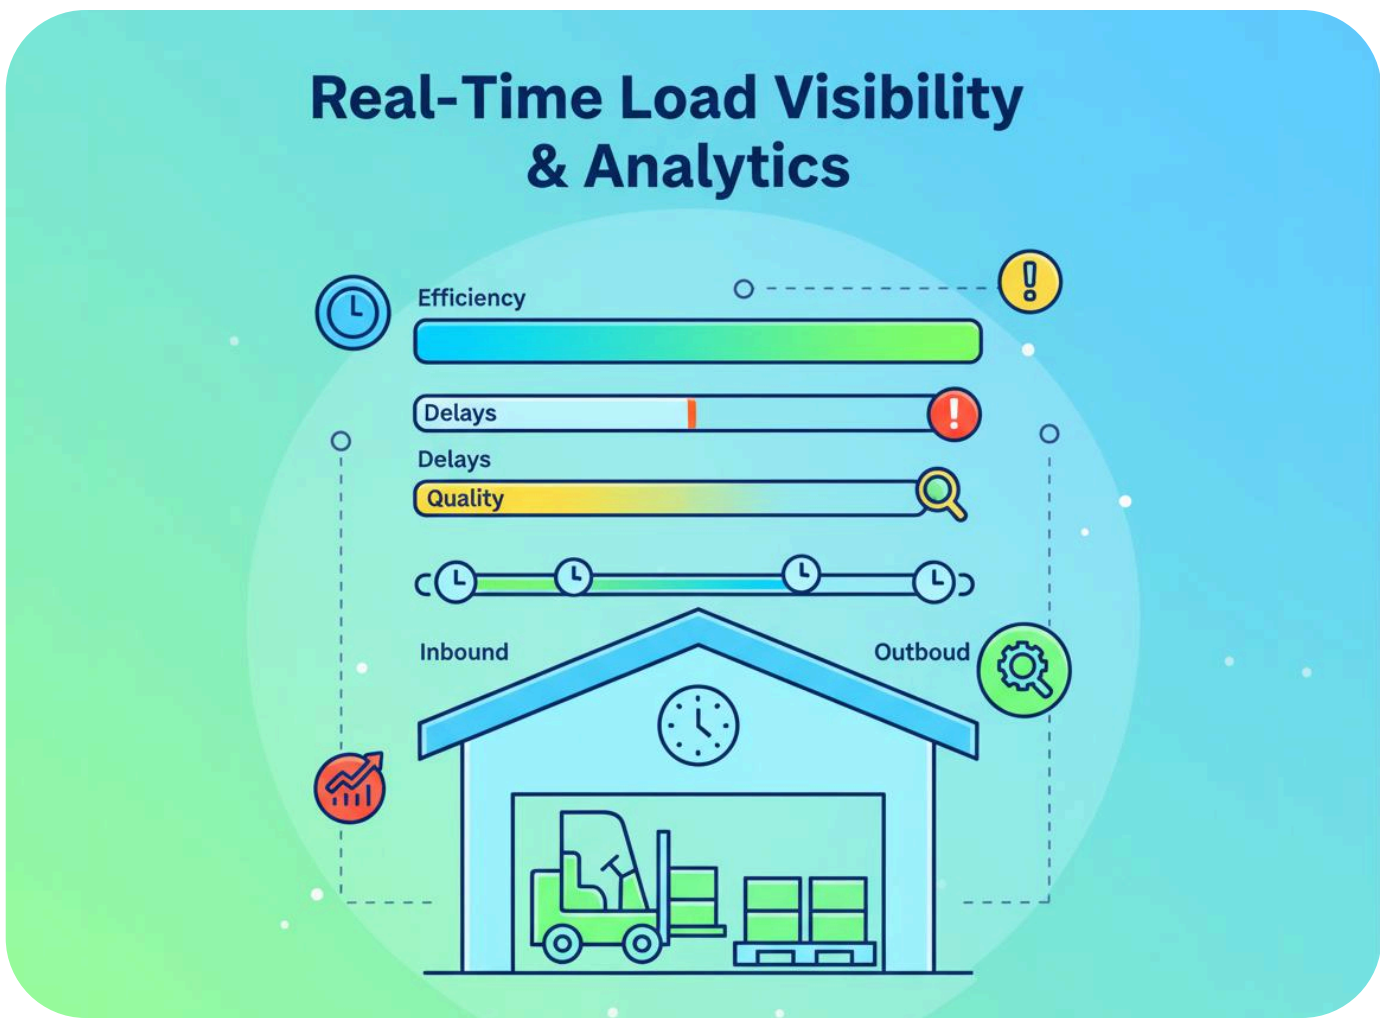

Generate detailed reports showing how long each process takes. Identify trends, spot slowdowns, and turn those insights into actions that save time and money across your operation.

Why It Matters

The Custom Category Load Time Tracker gives you control over one of the most critical factors in logistics: time. By knowing exactly where delays occur, you can prevent small inefficiencies from becoming costly problems. It’s a simple, affordable way to bring visibility, accountability, and continuous improvement into your workflow.
