Trusted Transfer of Shipments Records for Operational Efficiency

High-resolution shipment documentation is captured at every critical point in the supply chain. The challenge lies in ensuring that all load records, both new and historical, are easily accessible across different servers for reporting, audits, and operational analysis.

Load Record Transfer bridges this gap by automating the transfer of load records to your chosen server, guaranteeing that every shipment is securely stored, and ready for immediate use without any manual intervention.

Key Features of Load Record Transfer

Automated Record Transfers

Move shipment records seamlessly from one site to another server without manual intervention, saving time and effort.

Daily Data Synchronization

All newly uploaded shipment records are transferred daily, keeping your operational data consistently up-to-date.

Historical Load Migration

Existing shipment records can also be migrated to the target server, ensuring a complete, centralized repository of past and current shipments.

High Capacity Handling

Supports large operations by managing multiple shipment records efficiently, ensuring smooth and reliable transfers every day.

Flexible Integration

Works with various server environments and can be configured to meet your specific FTP or backend setup requirements.

Secure and Reliable

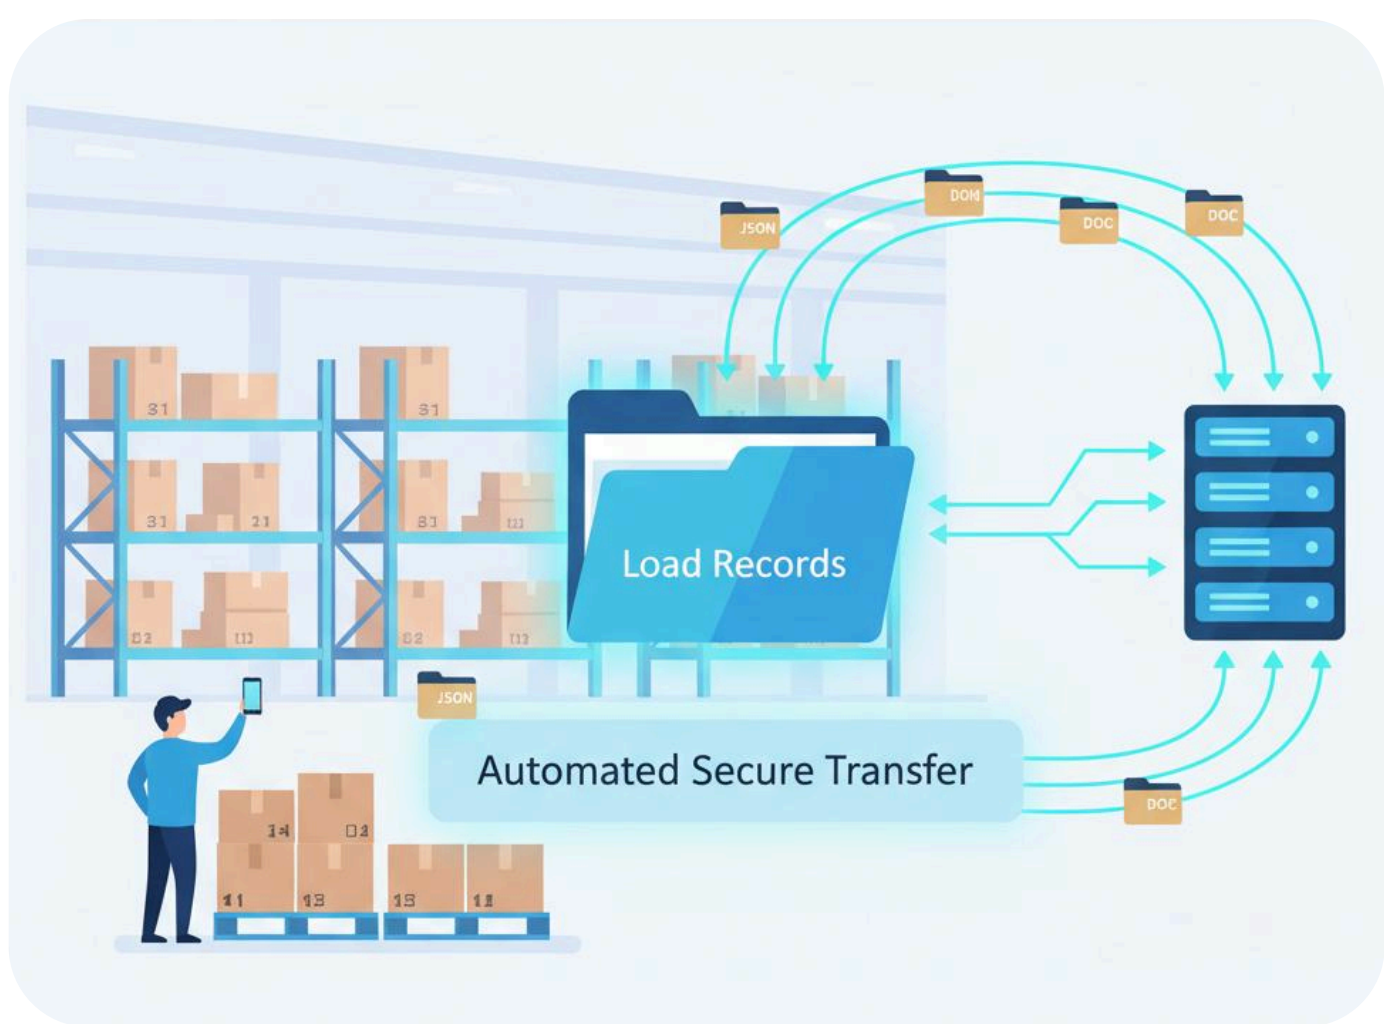

Data is transferred safely and consistently, maintaining integrity across all servers and providing teams with trusted, accurate records.
