Capture and Organize Crucial Proof When You Need It Most

In complex supply chain environments, documentation can't be a one-size-fits-all process. LoadProof's Advanced Upload Options give your teams the flexibility, security, and structure they need to manage all types of freight documentation, ensuring every piece of evidence is captured, organized, and instantly accessible with just a few clicks.

Flexibility and Convenience in Every Upload

1. Gallery Upload: Maximize Visual Evidence

Designed for speed and convenience, the Gallery Upload feature lets you snap photos directly from your mobile device and save them in your gallery for easy future use.

Effortless Image Capture

Quickly upload previously saved images as part of your shipment proof, simplifying freight claims with clear visual evidence.

Enhanced Flexibility

Perfect for users needing to incorporate older or specialized images into their shipment proof seamlessly.

2. Web Portal Upload: Secure Document Management

For sensitive or larger administrative files, the Web Portal Upload offers a secure, desktop-friendly solution.

Confidential Document Handling

Upload sensitive documents such as Purchase Orders (POs), Bills of Lading (BOLs), and Sales Orders directly from your desktop with confidence.

Easy Association

Link these documents to existing shipment proofs for centralized and comprehensive shipment management.

Administrator-Friendly

Perfect for teams managing sensitive information and requiring dedicated document support for shipments.

3. Document Type Upload: Organized and Structured

Ensure everything is filed correctly from the start. This feature streamlines on-the-go documentation directly through the LoadProof Mobile app.

Categorized Uploads

Capture and upload various document types (like POs and BOLs) directly from the LoadProof Mobile app.

Efficient Organization

Assign documents to their respective categories, ensuring easy access and structured organization within the LoadProof system.

Streamlined Documentation

Simplify the process of creating loads with properly categorized and uploaded documents.
