Empowering Smarter, Clearer Visual Documentation

In logistics and warehouse management, a picture is worth a thousand words but sometimes, you need to add a few of your own.

The LoadProof Lamina capability empowers your team on the ground to annotate images in real-time, directly from the mobile devices. Highlight damage, indicate specific handling instructions, or confirm perfect condition with intuitive sketches and shapes. It's visual communication, perfected.

Key Benefits - That Transform Your Visual Documentation

Intuitive In-App Sketching Tool

Go beyond standard photo capture. Our intuitive toolbar allows drivers and warehouse staff to draw freehand sketches, arrows, circles, rectangles, and more directly onto an image the moment it's taken.

Seamless Workflow Integration

There's no extra step, no separate app. Lamina is fully integrated within the LoadProof mobile experience. Once an image is annotated and saved, it is automatically synced and stored with the original load documentation.

Color-Coded Communication System

Assign meaning with color. Use red to flag critical damage, green to confirm "all good," yellow for cautions, and blue for informational notes. Create a universal, instant-visibility system across your entire operation.

Centralized Visibility on Web Platform

Edited images are not just stored on the phone. They are prominently displayed within the LoadProof and Picture Detail screens on your main web dashboard, exactly where your back-office and management teams expect to find them.

How Lamina Works

- 

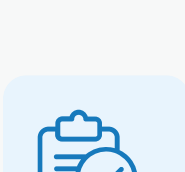

1. Capture

Take a photo of the load, pallet, or cargo through the LoadProof mobile app as usual.
- 

2. Annotate

Before uploading, tap the Lamina icon to open the editing toolbar. Select your tool (pen, shape, text) and color, and add your markups directly onto the image.
- 

3. Save & Sync

Save the annotated image. It automatically uploads and is filed with your load photo documentation.
- 

3. Review

Access the clearly annotated image from any device via the LoadProof web portal for review, reporting, and proof..
