Smarter, Mobile-First Shipment Documentation

LoadProof MultiLoad replaces paper trails and manual uploads with a smarter, mobile-first approach to shipment documentation. Built specifically for Android and iOS, MultiLoad empowers warehouse associates, drivers, supervisors, and logistics teams to capture high-quality photos and videos at the point of activity, whether that's shipping, receiving, or staging.

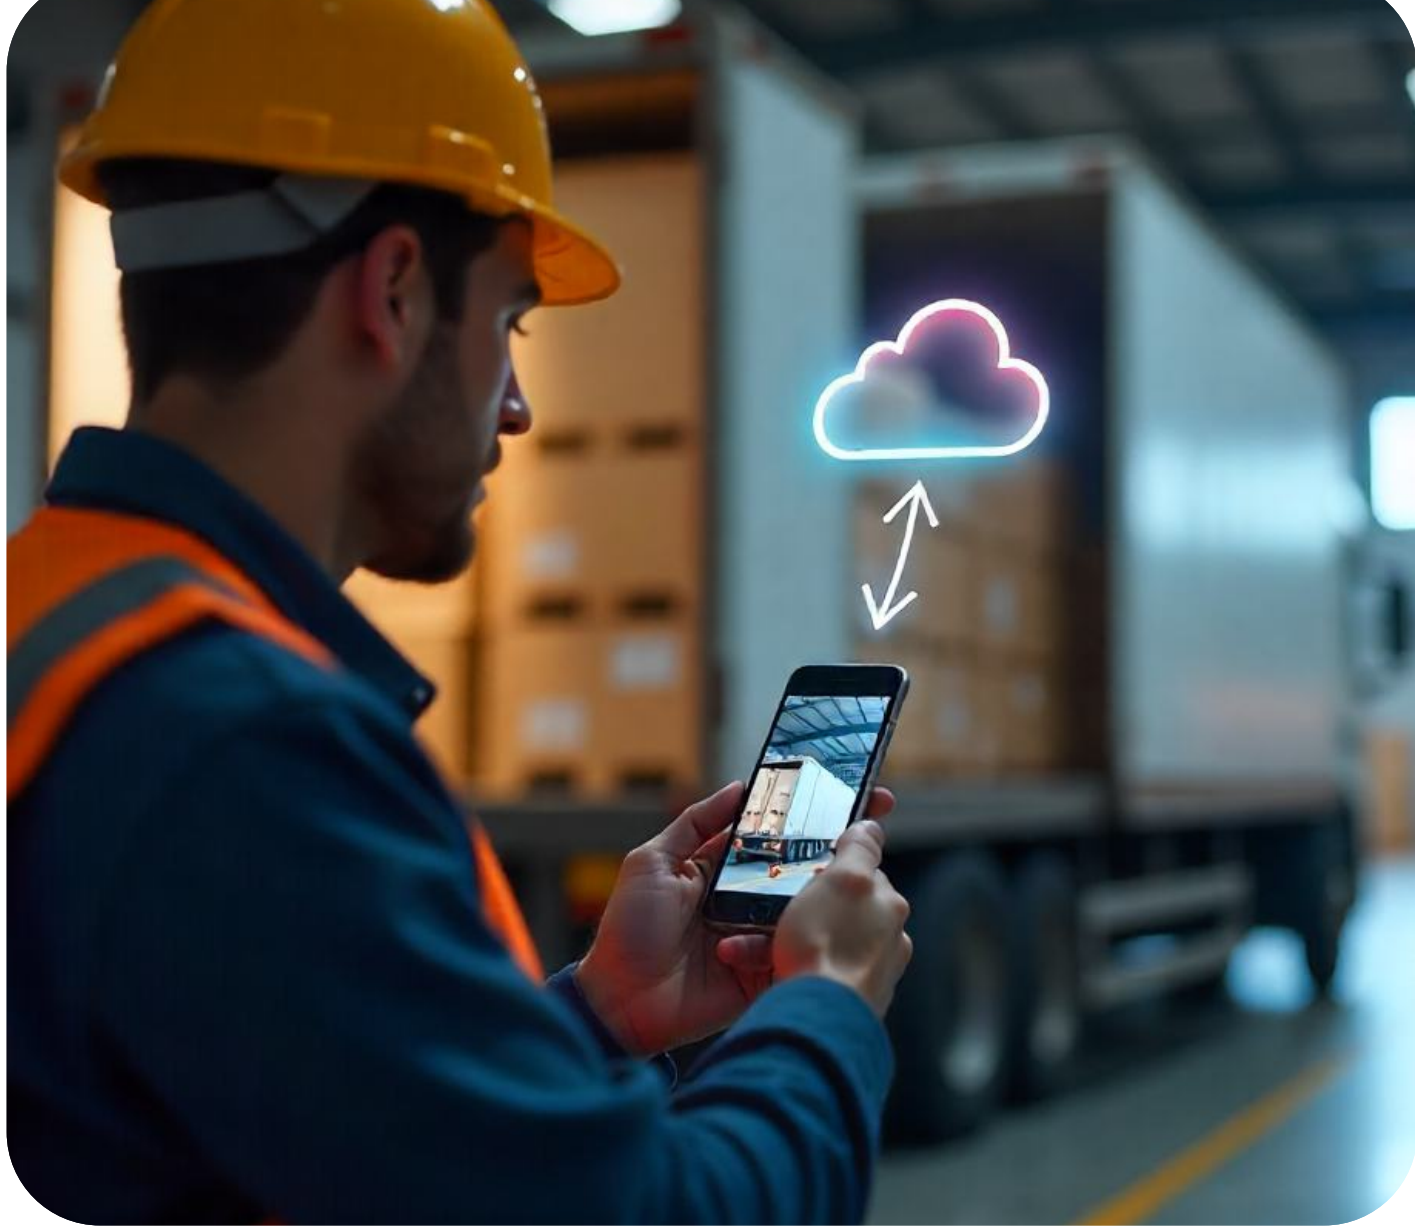

Key Benefits

Capture Everything Fast and Flexible

Document your work in one smooth flow. Whether you're loading a full trailer, staging a pallet, or checking inbound shipments, MultiLoad lets you capture multiple photos and videos in one session. There's no need to restart the process for each shot, saving time and keeping things efficient on busy warehouse floors.

Add Key Shipment Details Instantly

Add essential information like load number, PO, carrier name, dock door, or any custom field your operation requires right when you're capturing images. By organizing documentation at the point of activity, MultiLoad removes the guesswork later and helps maintain a clear chain of accountability.

Fast, Hassle-Free Uploads

Once documentation is complete, everything can be uploaded in one tap. And if your internet is slow or offline, the app automatically queues the upload and syncs when reconnected. No delays. No lost files. Just efficient, streamlined documentation.

Searchable, Shareable Proof When You Need It

Every image and video is securely stored with a timestamp, user ID, and shipment tag, making it easy to search, retrieve, and share later. Whether you're preparing for an audit, resolving a claim, or verifying a load, the proof is always ready, organized, accurate, and accessible.

What It Means For You

- No Training Needed:** If your team can take a photo on a smartphone, they can use MultiLoad.
- Compatible Across Devices:** Works seamlessly on Android and iOS phones or tablets no special hardware required.
- Scalable for Teams:** Ideal for individual users or entire supply chain teams, MultiLoad adapts to your operation's size and pace.

Features

Built-In Security & Compliance

All data captured through MultiLoad is securely stored in the cloud, meeting enterprise-grade security standards. With Smart Gladiator's SOC 2 Type II compliance, your visual records remain safe, compliant, and audit-ready.

Smarter Tools for Smarter Logistics

Experience the future of logistics documentation with LoadProof MultiLoad, where every shipment is visually proven, every detail is captured, and every operation is transparent.
