

What Is LoadProof ?

LoadProof is a SOC 2 Type II certified cloud based platform that can capture time-stamped, GPS-tagged photo and video proof at every step of your supply chain. We provide the undeniable proof you need to fight damage claims and protect your bottom line.

Photo and Video Proof for Your Supply Chain

LoadProof is a cloud-based photo and video proof system that helps supply chain teams eliminate shipping disputes, chargebacks, and rejected loads. It gives warehouse and logistics teams a simple way to capture, store, and retrieve visual proof of every shipment using time-stamped, geo-tagged photos and video—securely managed in a SOC 2 Type II compliant environment.

Instead of relying on manual processes or scattered files, LoadProof creates a structured, searchable record of every load. From the moment a pallet is built to the final delivery, every step is documented and instantly accessible when proof is needed.

How LoadProof Works

LoadProof replaces disconnected documentation methods with a streamlined, cloud based proof delivery workflow:

1. A Warehouse Operator Opens The Mobile App On Any Device

2. Photos Or Videos Of The Shipment Are Captured During Key Stages

3. Each File Is Automatically Timestamped, Geo-Tagged, And Categorized

4. The Evidence Is Uploaded Instantly And Linked To The Shipment Record

This mobile proof delivery system ensures that anyone, from warehouse managers to customers, can access shipment proof within seconds, without digging through emails or folders.

Who Uses LoadProof

LoadProof Is Built For Teams That Deal With High Shipment Volumes And Accountability At Every Handoff. This Includes:

Warehouse managers handling daily outbound and inbound loads

3PL operators managing multiple clients and facilities

Logistics directors responsible for reducing claims and disputes

Supply chain executives focused on cost control and visibility

Retail distribution teams dealing with strict compliance requirements

If your operation deals with chargebacks, OS&D issues, or missing proof, this is where supply chain photo proof becomes essential.

Key Benefits of LoadProof

Document Every Critical Stage Of Your Supply Chain Operations

Eliminates he-said-she-said disputes with timestamped photo evidence

Helps reduce chargebacks by proving shipment condition at every stage

Improves freight claim documentation with organized, searchable records

Supports faster shipping dispute resolution with instant access to proof

Enables consistent warehouse photo documentation across teams

Works on any mobile device — no expensive hardware required

Deploys across facilities quickly without disrupting operations

Integrates with existing warehouse and logistics systems

How LoadProof Compares

Most Teams Already Try To Document Shipments, But The Tools Fall Short.

LoadProof combines the flexibility of mobile capture with the structure of a true photo proof system, built specifically for supply chain operations.

Generic photo apps

Photos are not timestamped properly, not linked to shipments, and difficult to retrieve when needed.

Fixed-camera systems

Expensive to install, limited in coverage, and unable to capture key angles or mobile processes.

Paper documentation

Slow, inconsistent, and nearly impossible to search during disputes.

What Makes LoadProof Different

Beyond documentation, LoadProof turns visual data into operational insight with cloud based photo delivery

With built-in dashboards and reporting, teams can

- ✔ Track daily load volumes and user activity
- ✔ Identify trends in damages and claims
- ✔ Measure savings based on shipment value and risk areas

More importantly, it creates a standardized process across your operation. Every team captures proof the same way, every time, removing inconsistency and reducing risk.

Getting Started with LoadProof

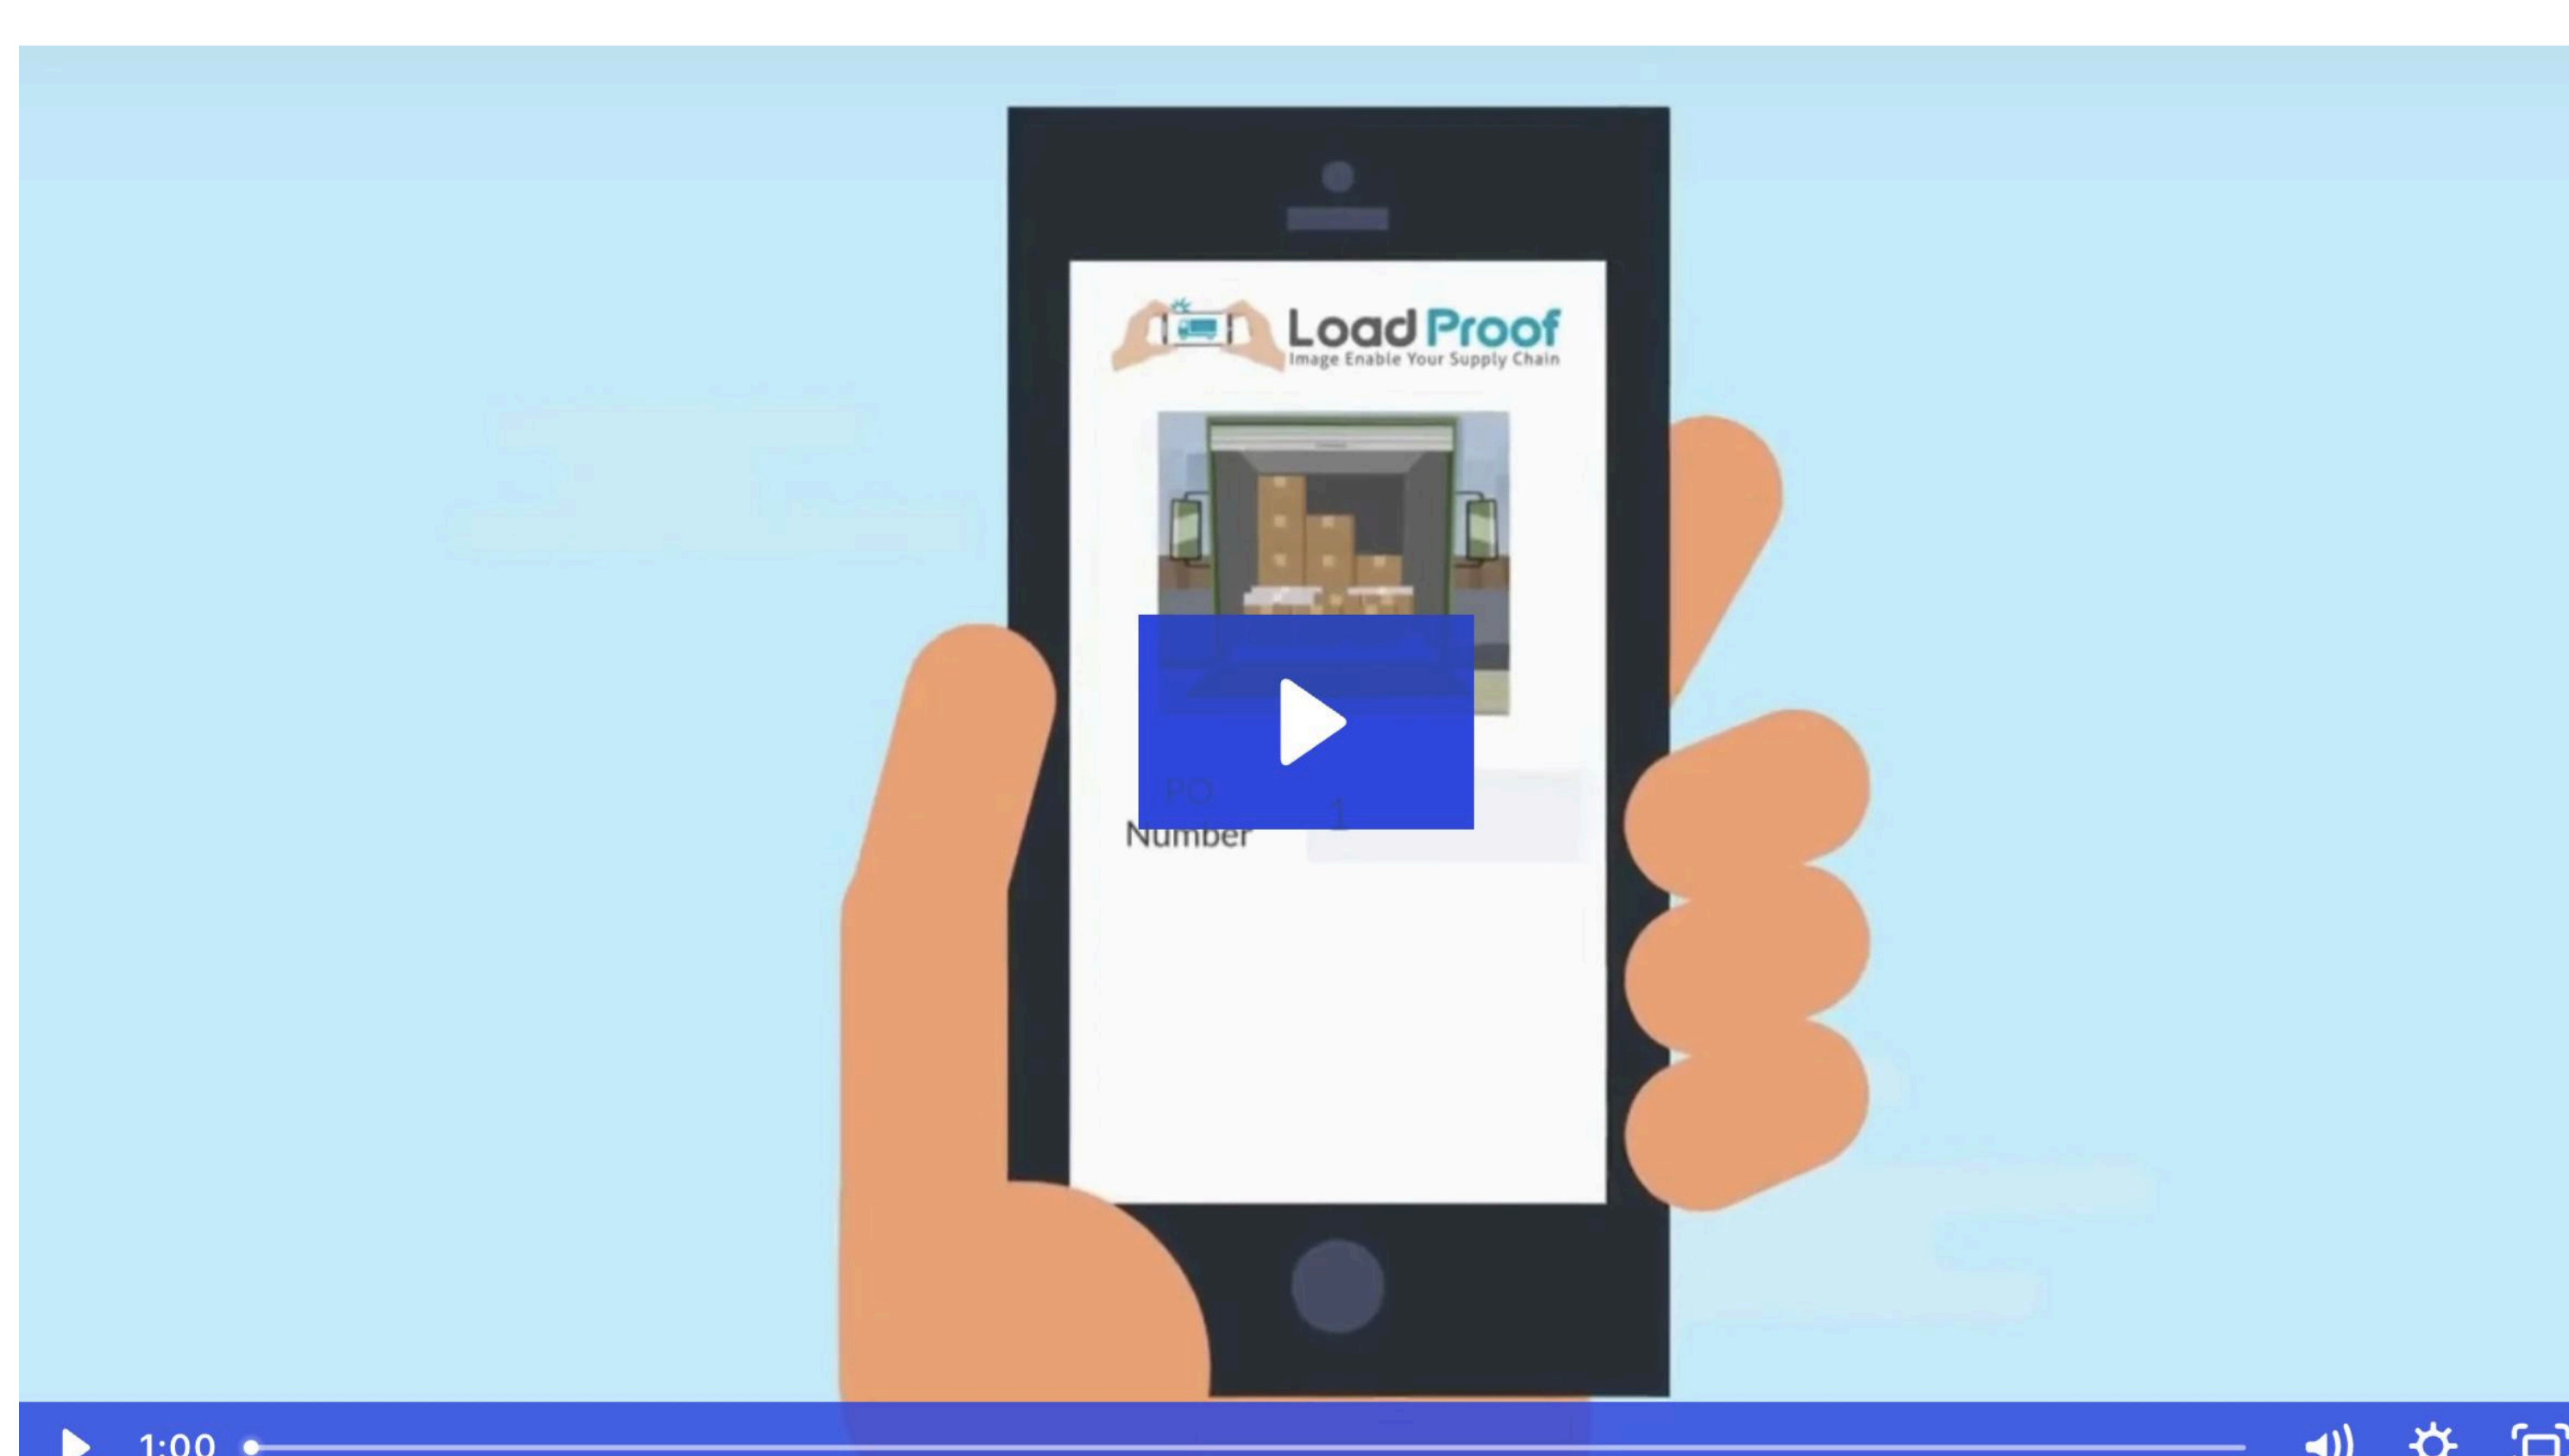

Getting started is simple. LoadProof is designed to fit into your existing workflow without adding complexity.

Whether you operate a single warehouse or manage multiple facilities, the platform scales with your needs—helping you capture proof, reduce losses, and improve accountability from day one.
